Direct Sourcing Solutions Ltd trading as DSS - Terms and Conditions of Sale

GENERAL

These conditions prevail over any conditions which the purchaser's order may purport to impose and which are at variance with the same. No modifications shall be binding upon Direct Sourcing Solutions Limited unless specifically accepted in writing. Direct Sourcing Solutions Ltd will be referred to as DSS hereafter. Typing and clerical errors are subject to correction. All orders or contracts are subject to acceptance by DSS at its office at Kirby Misperton, Malton, regardless if taken elsewhere by a sales person or a selling agent. Quotations do not constitute an offer and shall not bind DSS, until an order has been placed and accepted.

PAYMENT

Unless other terms are expressly agreed upon, payment is Nett 30 days monthly account. DSS reserves the right to impose on the buyer the special term "Cash on Delivery", if it considers it necessary. Payment should be made to Direct Sourcing Solutions Ltd. In addition to its other remedies DSS, reserves the right to change interest on delayed payment from the due date on a daily basis at Fortis Bank plc base rate from time to time in force plus three percent.

PROPERTY

Notwithstanding delivery and the passing of risk in the goods, the property in the goods shall not pass to the buyer until DSS has received in cash or cleared funds payment in full of the price of the goods sold or agreed to be sold by DSS to the buyer under the contract.

Until the property in the goods passes to the buyer:

- a) the buyer shall hold the goods as DSS bailee, and shall keep those goods separate from all other goods and property stored, protected and insured and identified as DSS's property and
- b) the buyer shall be entitled to resell or use the goods in the ordinary course of its business, but shall have a fiduciary duty to DSS to account for the proceeds of sale or otherwise of the goods, whether tangible or intangible, including insurance proceeds, and shall keep all such proceeds separate from any monies or property of the buyer and third parties and , in the case of tangible proceeds, property stored, protected and insured; and
- c) DSS shall be entitled at any time to require the buyer to deliver up the goods to DSS and, if the buyer fails to do so forthwith, to enter upon any premises of the buyer or any third party where the goods are stored and repossess the goods and for that purpose the buyer hereby authorises and licences DSS to enter upon any land or building upon which the goods are situated to recover those goods.

The buyer shall not be entitled to or in any way charge by way of security for any indebtedness any of the goods which remain the property of DSS, but if the buyer does so all monies owing by the buyer to DSS shall, without prejudice to any other right or remedy of DSS, forthwith become due and payable.

INSPECTION AND RETURN OF GOODS

If upon receipt of goods from DSS the goods do not appear to conform to specifications, the buyer must notify DSS within 5 working days after receipt in writing. The return of correctly supplied goods when accepted by DSS will incur a charge of 20% of the value of the goods excluding VAT at current rate. Goods supplied as special orders are not returnable. Goods cannot be returned without prior authorisation from DSS.

EXCHANGE ITEMS

A surcharge is levied on the exchange items (e.g. items that can be reconditioned). The surcharge is refundable subject to the following conditions:

- a) The exchange items are returned within 10 days.
- b) The exchange items are not broken, damaged or dismantled.

TELEPHONED ORDERS

Verbal or telephoned orders, or any variation, must be confirmed in writing by the Buyer otherwise DSS accept no responsibility for errors or subsequent misunderstandings. DSS assumes no responsibility for any orders which are duplicated, as a result of a confirming order not being identified as such.

ORDER CLASSIFICATION

VOR emergencies must be negotiated at the time of the order being placed. If the order product is available, it will be dispatched the same day, providing the order is received early enough to allow dispatch. We request VOR orders to be placed before 4.00pm

CATALOGUE, PRICE LIST AND OTHER ADVERTISEMENT MATTERS

Catalogues, price lists and other material used for advertising are only an indication of the type of goods, and no other particulars contained therein shall be binding to DSS.

VAT

Unless otherwise stated, all prices quoted by DSS do not include value added tax at the current rate.

PRICES

DSS reserves the right to vary the quoted price and goods will be invoiced at the price ruling at the day of dispatch unless otherwise agreed by DSS in writing.

DELIVERY DATES

Whilst DSS will do its utmost to keep its promised delivery dates, they are to be treated as estimates only. DSS accept no responsibility for loss or damage resulting from delay in the delivery of goods. Delays due to circumstances outside the control of DSS shall not entitle the buyer to cancel any order or to refuse to accept delivery.

WARRANTY CLAIM

In the event of a warranty claim DSS must be promptly notified in writing on the appropriate DSS form, and will only accept claims due to faulty materials or workmanship. Goods must be returned carriage paid for immediately upon the discovery of the defect. No credit will be given until such time as DSS is satisfied that such defects arose solely through mentioned causes and DSS has received credit from the manufacturer or supplier. DSS shall in no circumstances be liable for any consequential loss or damages. All replacement items for warranty claims will be booked out at the current DSS price.

DELIVERY CLAIMS

Damage in transit or shortage must be reported within 7 days of receipt of goods or, in the case of an undelivered consignment, within 7 days of the invoice date.

SECTION 2

COOLING

Increased fleet uptime with SKF automatic belt tensioner units for auxiliary drive systems.

The majority of trucks today are equipped with automatic belt tensioners in the auxiliary drive system. The market continues to increase, creating new demand for high quality products.

SKF's automatic belt tensioner units for auxiliary drive systems can **last up to twice as long** as components from other aftermarket suppliers. This means the SKF unit has a positive effect on the fleet uptime by increasing the life span of the complete auxiliary drive system.

Improved design for critical applications means an increased life span for the complete auxiliary drive system.

Round wire spring:
improves tensioner control and increases service life of the whole system

Labyrinth seal:
prevents contamination of the spring and extends life of the tensioner

Larger pivot shaft (22-25 mm):
improves the stability of the tensioner

Tandem 6303 bearings:
withstand higher load capacity and ensure longer bearing life

Noose ring technology:
reduces system vibration, leading to smoother operation and extended life of the tensioner

Stronger forged steel pulley:
minimises the risk of dislocation of the belt from the pulley

Sealing cap:
prevents contamination of the bearings and extends life of the tensioner

Did you know...

...that SKF provides a wide range of quality components for the largest truck brands in Europe including DAF, Iveco, MAN, Mercedes-Benz, Renault, Scania and Volvo. SKF seals, wheel bearings and auxiliary belt tensioners all **meet or exceed OE specifications** and they are available through a highly efficient distribution system in the aftermarket.

SECTION 9

HUBS & WHEELS

Discover the SKF wheel bearing offer for European trucks and trailers

Truck Matched Units (TMU) have two separate outer rings and two extended inner rings. TMUs are either lubricated with grease or with oil. The bearing itself is a low maintenance design. The clearance/preload setting is adjusted during manufacturing of the bearing.

The Truck Hub Unit 1 (THU1) system consists of a one piece outer ring and two extended inner rings, pre-greased and sealed for life. The THU1 is using grease lubrication. The bearing itself is a low maintenance design and must not be disassembled for service. The clearance/preload setting is adjusted during manufacturing of the bearing.

The Truck Hub Unit 2 (THU2) system is similar to the THU1. However, the outer ring design of the THU2 also includes a flange for mounting the wheel adapter. The THU2 system does not require an additional hub. The THU2 is solely grease lubricated. The bearing itself is a maintenance-free design and must not be disassembled for service. The clearance/preload setting is adjusted during manufacturing of the bearing.

Did you know...

... that even after a million kilometres under the harshest and toughest conditions, SKF wheel bearings can still run and perform as reliably as the day they are fitted.

Quality comes first. Always.

This is why leading truck manufacturers like Iveco, MAN, Mercedes-Benz, Renault, Scania and Volvo put their trust in us. And that's also why many fleet managers, mechanics and drivers worldwide think of us first for aftermarket products.

Trusted OE supplier

Well over half of the wheel bearings on new trucks being delivered today are manufactured and designed by SKF. Our OE knowledge in developing service life extending technologies is implemented also in our products for the aftermarket.

Superior engineering

Every wheel bearing, including its seals and lubrication is optimised for its specific application and for superior performance and long life. More than 140 years of seal manufacturing experience ensure optimum protection of the wheel bearings even in harshest conditions.

The complete SKF product range is available from your local distributor:
