## General Information

This Catalogue contains Aftermarket Spare Parts suitable for the Volvo FH12, FH13 and FH16, also FM7, FM9, FM10, FM12, and FM13 vehicles.

The first line contains the VTP Part Number, the second line, where applicable, shows the OE numbers and the following line **[in bold]** gives a brief description.

The following two lines relate to vehicle application with guidance as to the date window and individual model fitment, or to assist in identification of the engine, gearbox or rear axle type.

The final line offers additional information to help identification, with further qualification where possible using the engine or chassis number.

The FH12/16 was first introduced in 1993, the FM Model range followed in 1998. Approximately 75% of FM parts are common to the FH range, Cab & Body Parts being where the majority of differences occur.

In 2001/2002, the FH & FM range was radically re-engineered using a new series of Engines, Gearboxes and Rear Axles. This split is often referred to as Version 1 [>Dec2001] and Version 2 [Jan2002>]

In 2005/2006 the range was radically changed once again and a 13 litre Engine was introduced. The engine cubic capacity in litres was dropped from the model identification and replaced with the engine BHP. [for example instead of 'FH12' you will find 'FH390' or 'FH430' etc]

Whilst every effort has been made to ensure all information in this catalogue is correct, we cannot accept any responsibility whatsoever for any errors found in this publication.

To further assist in identifying individual parts using whatever information may be available [Manufacturer / Supplier Part Numbers etc], why not check out the VTP website and try our extensive Database Cross Reference Application.

## Engine Types Description

D        = Diesel Engine  
13       = Cubic Capacity in Litres  
A        = Engine Type  
400     = Engine Performance (BHP)

All FH/FM models use 6-cylinder engines.

The following engines may be installed:

FH Range;	D12A, D12C, D12D, D12D, D12D G6, D12F D13A, D13B, D13C D16A, D16B, D16C, D16E, D16G

The Engine Number / Type can be found either on a plate affixed to the engine, or stamped directly into the engine block. This number indicates the engine type followed by the individual Engine Serial Number, (e.g. D13 \* 001007).
